DETAILED ACTION

Response to Amendment

This office action is in response to request for reconsideration filed on October 30, 2006. Original application contained Claims 1-16. Applicant previously amended claim 4, 11-12, and added new claims 17-20. Therefore, presently Claims 1-20 are pending.

Response to Arguments

Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

Claims 1-16 are allowed.

Claims 18-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claim 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Linnartz ("The 'ticket' concept for copy control based on embedding signalling", Philips Research, 02/04/98).
2. With respect to claim 17 Linnartz discloses, a method comprising: receiving a segment of digital media content at a secure domain; determining whether the length of the segment is sufficient to enable detection of a watermark if present in the segment; and controlling importation of the segment into the secure domain in response to the segment length determination (page 4, 9-30, page 7, bullet 3; page 9, lines 5-8, line 16, and page 4, bullet 4, and page 9, bullet 1).
